

ENERSOL BIOPOWER PVT. LTD

Enersol Biopower®, founded in 2013, has built a strong reputation in the market for manufacturing, supplying, and distributing high-quality biomass-to-energy products. One of its notable innovations, the ESB-R Green- Agnika10, is a 10-inch smokeless biomass stove designed specifically for small-scale food businesses such as tea and coffee stalls, samosa/kachori vendors, and small PG houses.

Constructed from durable mild steel (MS), this stove ensures a long lifespan and reliable performance. It is equipped with a 4-inch AC fan, which enhances combustion efficiency while maintaining a clean and smokeless cooking experience. Additionally, it offers a flame adjustment feature, allowing users to regulate the heat intensity based on their cooking needs, making it an energy-efficient and cost-effective solution for small businesses.
